TOOLS / PLATFORMS	NodeJS, Git/Github, VScode, Postman
DATABASES	MongoDB, MySql

PROJECTS / OPEN-SOURCE

STUDYNOTION - EDTECH PLATFORM | [LINK](#) ReactJs, MongoDB, ExpressJs, NodeJs

- Developed a feature-rich MERN stack web application, "Study Notion," facilitating seamless interaction between students and instructors.
- Implemented secure user authentication, Razorpay integration for payments, and Cloudinary for multimedia content storage.
- Designed a secure EdTech platform with student progress tracking, instructor analytics, password hashing, and OTP for enhanced security.

CODE DETECTIVE | [LINK](#) HTML, TAILWIND CSS, JS, API

- Developed a GitHub Code Detective script, optimizing user data retrieval via backend API calls. Enhanced the application with dynamic light and dark modes for personalized interface customization, elevating user experience.

RAZORPAY-HOMEPAGE CLONE | [LINK](#) HTML, TAILWIND CSS

- Crafted a Razorpay homepage UI clone with HTML and Tailwind CSS, showcasing proficiency in front-end development.

CERTIFICATIONS

- Algorithmic Toolbox - COURSERA
- Web Development (MERN STACK) - CODEHELP
